Subject: Microsoft Settlement

To Whom it may concern,

I think the settlement worked out between Microsoft and the DOJ is unacceptable, especially in the area of education. By Microsoft giving their own products to schools, they are going to create a monopoly in about the only area they don't already have one. A better solution would be to distribute funds to the poor schools and let them decide what to buy with it. That way if Microsoft does become a monopoly in education, it will be legitimate. Thank you for your time.
